

## **Bisno's new plan is unrealistic**

Bob Bisno's new proposal for 1,950 units at Ponte Vista is irresponsible, unreasonable, unrealistic and most importantly, disrespectful to the community on the whole.

Only offering an approximately 15 percent (350-unit) reduction from his original plans, Bisno has not only fueled the fire for keeping the current zoning of R-1 at the site, but I feel he has placed a firm slap in the faces of many of his own supporters.

After all this time since the original 2,300-unit proposal was found by many to be too high a number, such a small reduction in the number of units seems to indicate that Bisno still doesn't get what our community really wants.

His refusal to consider all the "real San Pedrans" who happen to live in eastern Rancho Palos Verdes further indicates he refuses to really get to know the community he is attempting to change.
